Chemicals for professionals!

20 years
DOLPHIN
THIS IS OUR COMMON SUCCESS!

Your partner!

Ladies and Gentlemen,

who we are...

The Polish brand DOLPHIN has existed since 2003. and is identified in the chemical industry with professional agents for cleaning services and car cosmetics, as well as specialized disinfectant and biocidal preparations with a wide range of applications. When producing our chemicals, we constantly care about maintaining its high standards, ensuring and caring at the same time for safety when using it and protection of the natural environment.

in 2022 we have been distinguished by the Forbes Monthly as the LAUREATE OF THE FORBES DIAMONDS 2022 RANKING for all the work and related achievements.

our offer...

It fully satisfies the current needs of the market in terms of cleaning industrial, commercial, catering facilities, as well as health care and all other public utilities, as well as broadly understood cosmetics and keeping means of transport clean.

strategic and quality goals...

From the beginning of our production activity, the main strategic goal was to strive to create a comprehensive offer of professional agents of high quality and effectiveness, based on our own technology and experience.

achievements...

Thanks to carefully developed and constantly improved recipes - in accordance with the standards in force in the European Union, we have developed strong and efficient concentrates and ready-to-use products. The obtained quality often exceeds the effectiveness of popular preparations available on the Polish market, including also major foreign producers.

substantive and technical support...

In addition, we provide our customers with technical solutions that ensure simple and precise preparation of working solutions for everyday cleaning activities. Our regional coordinators are helpful in preparing individual hygiene plans tailored to the specifics of individual facilities.

benefits of working with us...

Many years of experience show that our offer addressed directly to potential distributors fully meets the needs of the market and has a positive impact on the economic indicators of its recipients through high efficiency and effectiveness.

FLOOR Clean (FLOOR Clean) Concentrate

Alcohol-based agent for manual cleaning and care of floors and floorings

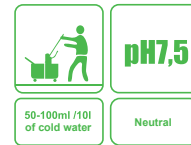

Advantages:

- ideal for floorings, wooden floors, panels and PVC
- recommended for regular washing of light dirt
- quickly evaporates from the cleaned surface
- leaves a pleasant and fresh floral scent

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D100
PROFESSIONAL

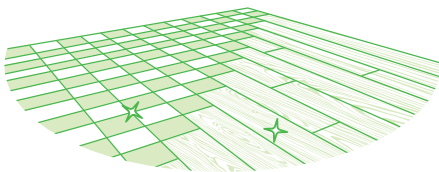

Application: For manual, daily cleaning and care of water-resistant stone / ceramic floors / wooden and wood-like floors / plastic surfaces - PVC, linoleum, tarket. Quickly evaporates from the washed surface, leaving a fresh floral scent.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

FLOOR fresh (FLOOR Clean fresh) Concentrate

Alcohol-based agent for manual cleaning and care of floors and floors

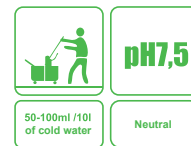

Advantages:

- ideal for floors, wooden floors, panels and PVC
- recommended for regular washing of light dirt
- quickly evaporates from the cleaned surface
- leaves a pleasant and fresh fruity scent

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D101
PROFESSIONAL

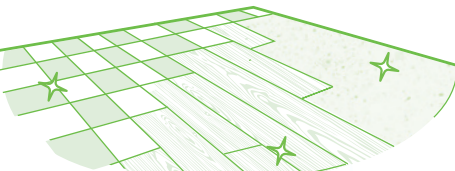

Application: For manual, daily cleaning and care of water-resistant stone / ceramic floors / wooden and wood-like floors / plastic surfaces - PVC, linoleum, tarket. Quickly evaporates from the washed surface, leaving a fresh fruity scent.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution according to the above-mentioned ranges / do not neutralize with water after washing.

BASIC Nano (Dolphin BASIC nano) Concentrate

NANO - The agent for ongoing cleaning and maintenance of floors

Advantages: A new fragrance: ORANGE!

- ideal for industrial and PVC floors
- recommended for basic cleaning of current dirt
- NANO - the technology cares for and protects the surface
- leaves a long-lasting orange scent

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D110
PROFESSIONAL

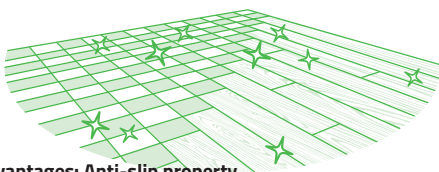

Application: For everyday and basic cleaning of water-resistant industrial floors - stone / concrete / ceramic / plastic surfaces - PVC, linoleum. Active NANO - the coating defends and protects the surface against re-deposition of dirt.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

BRILLANT (Dolphin BRILANT) Concentrate

Agent based on polymers for cleaning and care of floors and wooden floors

Advantages: Anti-slip property

(PN-EN 14904:2009/DIN 18032/2 standard)

- ideal for floors, wooden floors, panels and PVC
- effectively cleans, polishes and is completely washable
- cares for floors protected with varnishes
- leaves a pleasant and long-lasting fragrance

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D120
PROFESSIONAL

Application: For everyday cleaning and care of water-resistant stone / ceramic floors / wooden and wood-like floors / plastic surfaces - PVC, linoleum, tarket. Protects surfaces at higher concentrations and gives shine at lower concentrations.

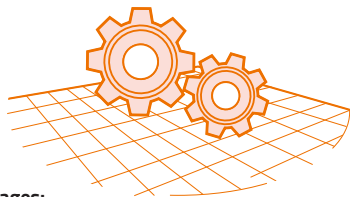

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

FLOORS – washing / thorough cleaning

FORTE (Dolphin FORTE) Concentrate

Agent for ongoing washing
and thorough cleaning of floors

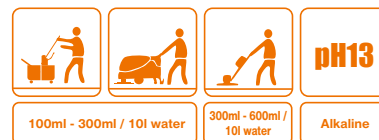

Advantages:

- widely used in cleaning current dirt
- ideal for removing organic dirt
- shows good cleaning properties
- leaves a pleasant smell after use

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D130
PROFESSIONAL

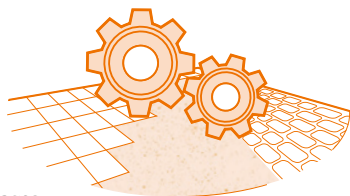

Application: For everyday washing and cleaning of current dirt from water-resistant floor surfaces - stone / ceramic / glazed / porcelain / linoleum / plastics and PVC. Perfect for cleaning organic dirt.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize the surface with water after washing.

POWER Clean (POWER CLEAN) Concentrate

Agent for thorough
cleaning of floors

Advantages:

- widely used for industrial floors
- very effectively removes any heavy dirt
- ideal for concrete, stone, paving and PVC
- low-foaming, odorless agent

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D140
PROFESSIONAL

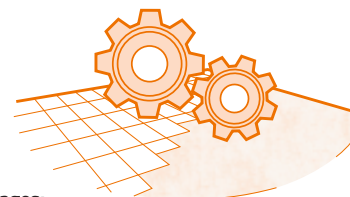

Application: For thorough cleaning of heavy dirt from all water-resistant floor surfaces - concrete / cobblestones / stone / porcelain tiles / linoleum / plastics and PVC.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize the surface with water after washing.

Acid POWER (Acid POWER CLEAN) Concentrate

Acidic cleaner and primer
floor cleaning

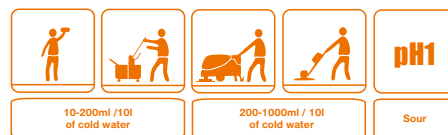

Advantages:

- effective in post-renovation cleaning of surfaces
- removes cement and gypsum deposits, renews joints in joints
- recommended for all acid-resistant surfaces
- safe for use in washing machines

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D141
PROFESSIONAL

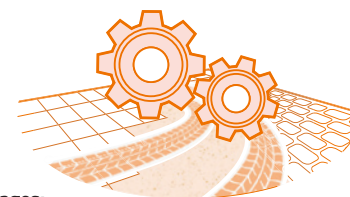

Application: For washing and thorough cleaning of all acid-resistant floors/surfaces: stone, stoneware, ceramic and stainless steel, in post-renovation facilities as well as in current use. Do not use on limestone, aluminium, varnished surfaces, acrylic glass and damaged enamel, chrome or plastic surfaces.

Method of use: Prepare the working solution in dilution in accordance with the above-mentioned ranges, depending on the degree and type of dirt / in case of contact with a surface that is not resistant to acids - rinse immediately with water / in doubtful cases - check the action in a barely visible place.

GRESOL (GRESOL) Concentrate

Agent for thorough
cleaning of floors

Advantages:

- widely used for industrial floors
- effectively removes traces of rubber, rubber and soot
- ideal for tiles, concrete, stone, cobblestones, linoleum and PVC
- low-foaming, odorless agent

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D150
PROFESSIONAL

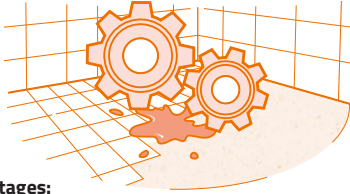

Application: For thorough cleaning of heavy dirt from all water-resistant floor surfaces / concrete / cobblestones / stone / porcelain tiles / linoleum / plastics and PVC. Particularly effective for removing rubber, rubber and soot marks.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize the surface with water after washing.

FLOORS – removal of polymer layers

SUPER Oil (SUPER OIL Cleaner) Concentrate

Agent for thorough degreasing of floors and washable surfaces

Advantages:

- widely used in industry and catering
- effectively removes and cleans strong grease
- ideal for „hard“ surfaces and work clothes
- leaves a pleasant smell after use

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D145
PROFESSIONAL

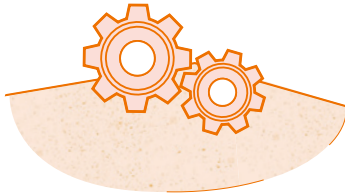

Application: For thorough washing and cleaning of heavy oil and grease stains from the surfaces of floors / concrete / paving stones / washable internal and external facades / over-floor surfaces / plastic door and window frames / kitchen hoods / grilles and ventilation ducts. Also recommended for washing oily fabrics and work clothes in industrial washing machines.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize the surface with water after washing.

FLOORS – removal of polymer layers

ACTIVE Floor (ACTIV FLOOR) Concentrate

Stripper for removing polymer layers from floors

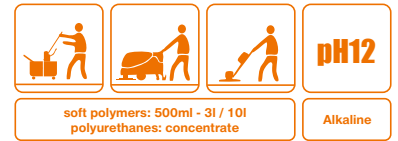

Advantages:

- effectively removes old polymer layers
- perfectly cleans the washed surface
- guarantees the durability of new polymer layers
- best for D520 / D540 protective emulsions

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D160
PROFESSIONAL

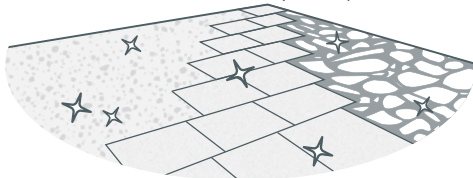

Application: For thorough cleaning and removal of polymer layers from all water-resistant floor surfaces - concrete / stone / porcelain / linoleum / plastics and PVC. Effectively cleans and prepares the floor for new polymer layers and guarantees their durability.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / neutralize with water after washing.

FLOORS – protection with polymers

DISPERSION Office (FLASH DISPERSION office) Ready to use

Gloss emulsion to protect floors

Advantages:

- ideal for tiles, stone, PVC, linoleum etc.
- resistant to abrasion and other physical and chemical factors
- recommended for rooms with medium traffic
- adapted to the D160 cleaning stripper

Capacity	(l)	1	5	10	20
Box	(pcs)	–	–	–	–
Pallet	(pcs)	–	108	–	–

D540
PROFESSIONAL

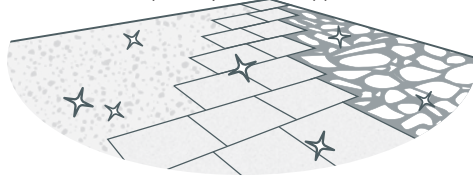

Application: For professional protection of waterproof floors - porcelain / stone / PVC, linoleum and other plastics. It shows very good resistance to abrasion and other physical and chemical factors / recommended for rooms with medium traffic / can be used alone or as a finishing coat after D520.

Method of use: Cover the cleaned, neutralized and dried surface with 1st to 3rd layers of emulsion / leave to dry (approx. 1 hour). For a lasting effect, polish the next layer with a high-speed polisher.

DISPERSION Plus (FLASH DISPERSION plus) Ready to use

Gloss emulsion based on polyurethanes for the protection of floors

Advantages: Anti-slip property (ASTM D2047-044 standard)

- ideal for concrete, stone, porcelain tiles and terrazzo surfaces
- very resistant to abrasion and other factors
- recommended for rooms with heavy traffic
- adapted to the D160 cleaning stripper

Capacity	(l)	1	5	10	20
Box	(pcs)	–	–	–	–
Pallet	(pcs)	–	108	–	–

D520
PROFESSIONAL

Application: For professional protection or impregnation of water-resistant floors - concrete / stone / porcelain stoneware and terrazzo surfaces. It shows high resistance to abrasion and other physicochemical factors as well as impregnation properties / recommended for rooms with high traffic / can be used alone or as a base under D540.

Method of use: Cover the cleaned, neutralized and dried surface with 1st to 2nd layers of emulsion / leave to dry (approx. 1 h). For a lasting effect, polish the next layer with a high-speed polisher.

SURFACES – universal washing / care

OFFICE Aroma (Dolphin OFFICE aroma) Concentrate

Long-lasting alcohol-based cleaner for washing washable surfaces

Advantages:

- recommended for high-standard rooms
- effectively cleans, cares for and protects
- quickly evaporates and dries the surface
- leaves a long-lasting and pleasant fragrance

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D330
PROFESSIONAL

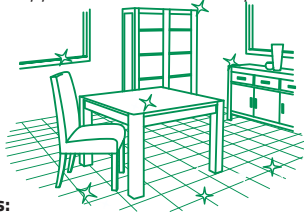

Application: For daily manual washing and care of water-resistant surfaces in hotels and high-standard rooms - floors / furniture / shelves / protected wood / metalwork / plastic surfaces, excluding leather and imitation leather upholstery.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

SURFACES – universal washing / care

UNIVERSAL Aroma (UNIVERSAL aroma) Concentrate

Alcohol-based agent for cleaning and care of floors and washable surfaces

Advantages:

- wide range of applications
- effectively cleans and cares
- evaporates quickly from the surface
- leaves a long-lasting fragrance in the room

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D313
PROFESSIONAL

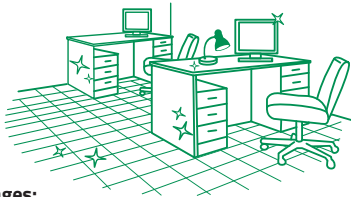

Application: For everyday cleaning and care of waterproof floors / furniture / shelves / door, window and wall joinery / plastic surfaces, excluding leather and imitation leather upholstery. It has the "PZH" Approval – "HŽ" Health Quality Certificate.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

UNIVERSAL Extra (UNIVERSAL Extra) Concentrate

Alcohol-based agent for cleaning and care of floors and washable surfaces

Advantages:

- wide range of applications
- effectively cleans and cares
- evaporates quickly from the surface
- leaves a fresh fragrance in the room

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D310
PROFESSIONAL

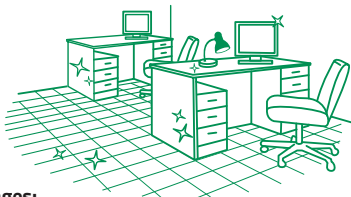

Application: For everyday cleaning and care of waterproof floors / furniture / shelves / door, window and wall joinery / plastic surfaces, excluding leather and imitation leather upholstery. It has the "PZH" Approval – "HŽ" Health Quality Certificate.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

UNIVERSAL Citro (UNIVERSAL Citro) Concentrate

Alcohol-based agent for cleaning and care of floors and washable surfaces

Advantages:

- wide range of applications
- effectively cleans and cares
- evaporates quickly from the surface
- leaves a fresh fragrance in the room

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D311
PROFESSIONAL

Application: For everyday cleaning and care of waterproof floors / furniture / shelves / door, window and wall joinery / plastic surfaces, excluding leather and imitation leather upholstery. It has the "PZH" Approval – "HŽ" Health Quality Certificate.

Method of use: Dilute the concentrate with cold water / use the concentration of the solution in accordance with the ranges given above / do not neutralize with water after washing.

SURFACES – ceramics / glazing / furniture – washing / care

CLEAN Eco (ECO-Nano UNIVERSAL) Ready to use

Ecological alcohol-based agent for cleaning and care of furniture, ceramics and glazing

Advantages:

- very safe for the environment
- effectively cleans and cares, has an antistatic effect
- evaporates quickly and leaves no streaks
- leaves a lasting and fresh fragrance in the room

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	–

D312
PROFESSIONAL

Application: For everyday washing and care of washable surfaces - furniture / shelves / door, window and wall joinery / ceramics / glass and glazing / plastic surfaces, excluding leather and imitation leather upholstery. Ecological and modern formula guarantees perfect effect, transparency and shine as well as quick evaporation of the washed surface.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

SURFACES – furniture – washing / care

CLEAN Aroma (UNIVERSAL Clean aroma) Ready to use

Alcohol-based agent for cleaning and caring for furniture and washable surfaces

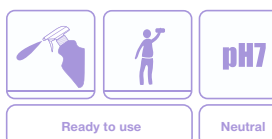

Advantages:

- effectively cleans and cares
- secures and leaves no streaks
- evaporates quickly from the surface
- leaves a long-lasting fragrance in the room

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	–

D323
PROFESSIONAL

Application: For everyday cleaning and care of waterproof furniture / shelves / door, window and wall joinery / ceramics / plastic surfaces, excluding leather and imitation leather upholstery. It has the "PZH" Approval – "HZ" Health Quality Certificate.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

CLEAN Extra (UNIVERSAL Clean) Ready to use

Alcohol-based agent for cleaning and caring for furniture and washable surfaces

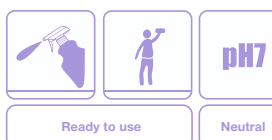

Advantages:

- effectively cleans and cares
- secures and leaves no streaks
- evaporates quickly from the surface
- leaves a fresh fragrance in the room

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	–

D320
PROFESSIONAL

Application: For everyday cleaning and care of waterproof furniture / shelves / door, window and wall joinery / ceramics / plastic surfaces, excluding leather and imitation leather upholstery. It has the „PZH“ Approval - „HZ“ Health Quality Certificate.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

CLEAN Citro (UNIVERSAL Clean citro) Ready to use

Alcohol-based agent for cleaning and caring for furniture and washable surfaces

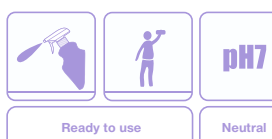

Advantages:

- effectively cleans and cares
- secures and leaves no streaks
- evaporates quickly from the surface
- leaves a fresh fragrance in the room

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	–

D321
PROFESSIONAL

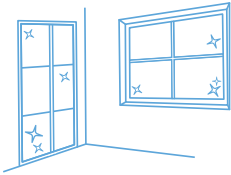

Application: For everyday cleaning and care of waterproof furniture / shelves / door, window and wall joinery / ceramics / plastic surfaces, excluding leather and imitation leather upholstery. It has the „PZH“ Approval - „HZ“ Health Quality Certificate.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

SURFACES – windows / glazing - washing / thorough cleaning

CRYSTAL Nano (CRYSTAL nano) Ready to use

NANO - an alcohol-based agent
for cleaning and maintaining windows and glazing

Advantages:

- effectively cleans, cleans and cares
- evaporates quickly and leaves no streaks
- NANO - technology protects surfaces
- has anti-static properties and prevents fogging

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	40

D360
PROFESSIONAL

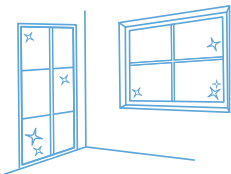

Application: For everyday cleaning, care and protection of all glass, glazed and glazed surfaces – glass / mirrors / transparent plastic and plastics. Active NANO - the coating protects the surface against re-deposition of dirt and fogging.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

CRYSTAL Eco (ECO CRYSTAL) Ready to use

Ecological alcohol-based agent for cleaning and caring
for windows and glazing

Advantages:

- very safe for the environment
- effectively cleans, cleans and cares
- evaporates quickly and leaves no streaks
- completely biodegradable

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	40

D361
PROFESSIONAL

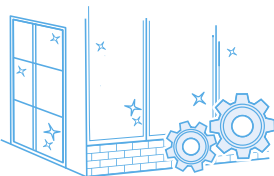

Application: For everyday washing, cleaning and care of all glass, glazed and glazed surfaces – glass / mirrors / transparent plastic and plastics. Ecological and modern formula guarantees perfect transparency, shine and quick evaporation of the washed surface.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

CRYSTAL Super (SUPER CRYSTAL) Concentrate

Alcohol-based agent for cleaning and thorough cleaning
windows and glazing

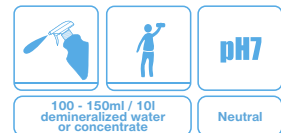

Advantages:

- effectively washes and cleans heavy dirt
- evaporates quickly and leaves no streaks
- highly concentrated and efficient to use
- ideal for exterior facade glazing

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D350
PROFESSIONAL

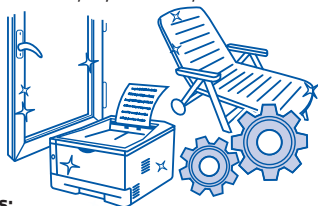

Application: For washing and cleaning glass, glazed and glazed surfaces – glass / mirrors / transparent plastics. Highly concentrated and efficient / ideal for exterior facade glazing.

Method of use: Prepare the working solution with demineralized water and, in accordance with the above concentrations / use an atomizer, sprinkle the surface with a ready-to-use agent / wipe dry with a cloth or cleaning cloth / heavy dirt - concentrate.

SURFACES – plastics - thorough cleaning / care

PLAST Clean (PLAST Clean) Ready to use

Agent for cleaning and caring
for plastic surfaces

Advantages:

- effectively cleans stubborn deposits
- renews the structure of the material and makes it shine
- protects against re-soiling
- safe for all plastics

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	–	–
Pallet	(pcs)	480	–	–	–

D550
PROFESSIONAL

Application: For cleaning and caring for plastic or plastic coated interior and exterior surfaces – office appliances and furniture / window frames / PVC panels / furniture and garden equipment. It has the „PZH“ Approval - „HZ“ Health Quality Certificate.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

SURFACES – stainless steel - cleaning / care

STAL Clean (STAL Clean) Ready to use

Product for cleaning and care
of stainless steel surfaces

Advantages:

- effectively removes greasy deposits, dust and discoloration
- refreshes and polishes the surface
- secures and leaves no streaks
- completely washable when reused

D370
PROFESSIONAL

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	–	–
Pallet	(pcs)	480	–	–	–

Application: For removing dirt from dust and greasy deposits and for the care of stainless steel surfaces - cooker hoods / refrigerators / ovens / hobs / appliances and equipment in catering and hotel industry / lift surfaces. Do not use for plastic and painted elements. It has the „PZH“ Approval - „HZ“ Health Quality Certificate.

Method of use: Sprinkle the cleaned surface with an atomizer / wipe dry with a cloth or cleaning cloth.

SURFACES – difficult dirt - graffiti / glue / rubber - thorough cleaning

STRONG Cleaner (STRONG Cleaner) Ready to use

A product for removing tough,
water-insoluble dirt

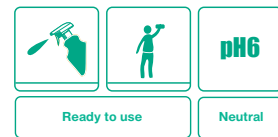

Advantages:

- works quickly and effectively cleans
- dissolves glue, rubber and caoutchouc residues
- removes traces of ink and graffiti from smooth surfaces
- safe for solvent-resistant surfaces

D200
PROFESSIONAL

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	–	–
Pallet	(pcs)	480	–	–	–

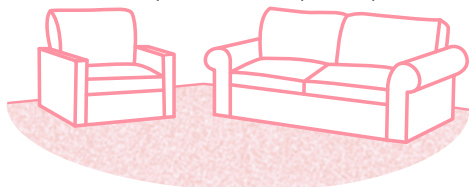

Application: For quick removal of stubborn dirt - glue residues / rubber and rubber stains / soot / ink / graffiti. Use on solvent-resistant surfaces - plastics / glass / ceramics / tiles / stone / concrete / enameled and varnished surfaces.

Method of use: Sprinkle the cleaned surface with an atomizer / wipe dry with a cloth or cleaning cloth.

SURFACES – carpets / rugs / upholstery - wet washing

PERS (PERS) Concentrate

Extractive cleaner for washing carpets,
carpets and textile upholstery

Advantages:

- effectively cleans all dirt
- deeply penetrates the cleaned surface
- refreshes the colors after use
- leaves a pleasant floral scent

D180
PROFESSIONAL

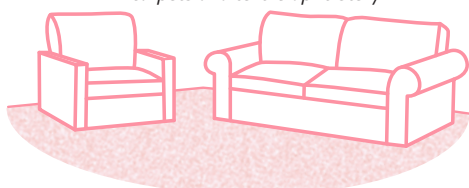

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	–	–

Application: For thorough cleaning - wet washing - with an extraction vacuum cleaner for carpets / textile floor coverings and car upholstery, excluding leather and imitation leather upholstery.

Method of use: Using an extraction vacuum cleaner, spread the solution evenly on the surface / vacuum with a vacuum cleaner and allow it to dry completely / vacuum the dry surface again / prepare the working solution diluted in accordance with the above-mentioned ranges.

PERS Shampoo (PERS Shampo) Concentrate

Product for manual washing of carpets,
carpets and textile upholstery

Advantages:

- effectively cleans all dirt
- deeply penetrates the cleaned surface
- refreshes the colors after use
- leaves a pleasant floral scent

D190
PROFESSIONAL

Capacity	(l)	1	5	10	20
Box	(pcs)	12	–	–	–
Pallet	(pcs)	360	–	–	–

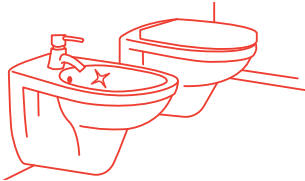

Application: For thorough manual cleaning - wet cleaning - of carpets / textile floor coverings and car upholstery, excluding leather and imitation leather upholstery.

Method of use: Create a dense foam / evenly apply to the surface with a sponge or brush / allow to dry completely / vacuum the dry surface again / prepare the working solution diluted in accordance with the above-mentioned ranges.

SANITARY FACILITIES – ongoing washing / care

SANI Red (SANI ACID aroma gel) Concentrate

Gel agent for cleaning and caring for internal surfaces of sanitary facilities

Advantages:

- cleans, cares for and protects ceramic surfaces
- removes stone, rusty and organic water stains
- leaves an active and washable coating on the surface
- provides a long-lasting and fresh fragrance after use

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	12	4	–
Pallet	(pcs)	480	360	108	–

D223
PROFESSIONAL

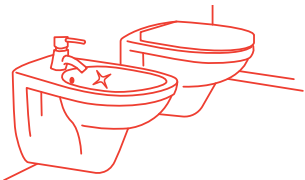

Application: For daily cleaning, care and protection of ceramic sanitary ware – toilet bowls / urinals / bidets. The active coating protects the surface and is washable after a few rinses. It has the „PZH“ Approval – „HZ“ Health Quality Certificate.

Method of use: Spread the concentrate on the surface of the sanitary facility / rinse thoroughly with water after a short while / do not use the concentrate on chrome and enamel surfaces.

SANI Blue (Super SANI ACID gel) Concentrate

Gel agent for cleaning and caring for internal surfaces of sanitary facilities

Advantages:

- cleans, cares for and protects ceramic surfaces
- removes stone, rusty and organic water stains
- leaves an active and washable coating on the surface
- provides a long-lasting and fresh fragrance after use

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	12	4	–
Pallet	(pcs)	480	360	108	–

D222
PROFESSIONAL

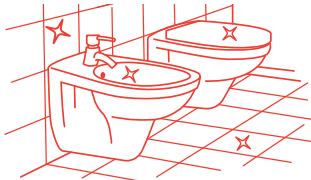

Application: For daily cleaning, care and protection of ceramic sanitary ware – toilet bowls / urinals / bidets. The active coating protects the surface and is washable after a few rinses. It has the „PZH“ Approval – „HZ“ Health Quality Certificate.

Method of use: Spread the concentrate on the surface of the sanitary facility / rinse thoroughly with water after a short while / do not use the concentrate on chrome and enamel surfaces.

SANI Dry (SANI ACID aroma dry) Concentrate

Non-gel agent for cleaning and care of surfaces in sanitary facilities

Advantages:

- washes and cares for all surfaces in sanitary facilities
- removes stone, rusty and organic water stains
- safe for all surfaces when diluted
- provides a fresh fragrance after use

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	–

D226
PROFESSIONAL

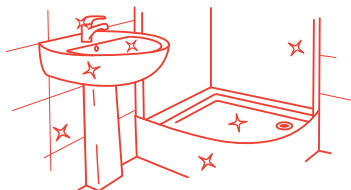

Application: For everyday cleaning and care of all devices and floor and wall surfaces in sanitary facilities – toilet bowls / urinals / bidets / fittings / floor and wall tiles and plastic surfaces. It has the „PZH“ Approval – „HZ“ Health Quality Certificate.

Method of use: Spread the concentrate on the surface of the sanitary facility / rinse abundantly with water after a short while / do not use the concentrate on chrome and enamel surfaces / prepare the working solution diluted in accordance with the above-mentioned ranges.

SANI Clean (SANI CLEAN fresh nano) Ready to use

NANO - an agent for cleaning and caring for surfaces in sanitary facilities

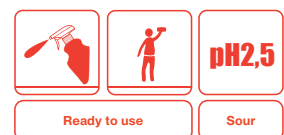

Advantages:

- effectively cleans and cares for all surfaces
- removes soap, stone and rusty stains
- NANO - the technology protects the washed surface
- gives shine and leaves a fresh scent

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–

D245
PROFESSIONAL

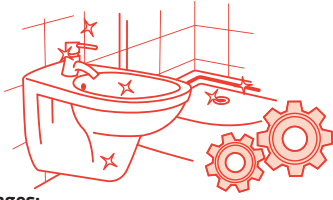

Application: For everyday cleaning, care and protection of all external surfaces of sanitary devices – washbasins / fittings / toilets bowls / urinals / bidets / shower cabins / bathtubs and shower trays / wall tiles. Active NANO - the coating protects the surface against re-deposition of dirt.

Method of use: Use an atomizer to sprinkle the surface with a ready-to-use agent / wipe it dry with a cloth or cleaning cloth.

SANITARY FACILITIES – thorough cleaning / biocidity

SANI MAX gel (SANI MAX gel) Concentrate

Gel intended for washing and disinfecting toilets and sanitary facilities

Advantages:

- effectively removes sediments and organic deposits
- disinfects, has a bactericidal and fungicidal effect
- active chlorine eliminates unpleasant odors
- does not damage ceramics, enamel and fittings

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	12	4	–
Pallet	(pcs)	480	360	108	40

D210
PROFESSIONAL

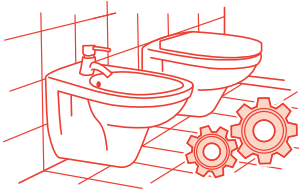

Application: The gel is intended for washing and disinfecting toilets and sanitary facilities – toilet bowls, urinals, bidets, washbasins, bathtubs, shower cubicles and shower trays. The product has a bactericidal and fungicidal effect. The product can be used on all enamel, metal and chrome surfaces – fittings, and plastics.

Method of use: Apply to the surface and/or spread with a sponge or cloth. Leave it on for 15 minutes, then rinse thoroughly with water. Recommended for cleaning silicone seals of devices and joints of wall tiles. Effectively removes sediments and organic deposits, preventing their re-formation. Active chlorine eliminates unpleasant odors.

SANI Power (SANI POWER) Concentrate

A powerful agent for thorough cleaning of surfaces in sanitary facilities

Advantages:

- effectively cleans surfaces resistant to acids
- eliminates all organic and inorganic deposits
- removes stone, rust and cement stains
- ideal for sanitary facilities, floors and tiles

Capacity	(l)	0,75	5	10	20
Box	(pcs)	20	4	–	–
Pallet	(pcs)	480	108	40	–

D230
PROFESSIONAL

Application: For thorough cleaning of acid-resistant surfaces and devices in sanitary facilities – toilet bowls / urinals / bidets / floors and wall tiles. Removes stone stains / rust / cement residues / organic deposits.

Method of use: Prepare the solution diluted in accordance with the above-mentioned ranges / spread in the device or on a washed surface with a cloth or mop / rinse with water after a short while or neutralize with water with a mop or cloth / do not use on chrome and enamel surfaces.

SANITARY FACILITIES – hand hygiene

GREEN Banana / BLUE Aroma (GREEN BANANA / BLUE aroma) Ready to use

A concentrated soap for hand hygiene based on glycerin and lanolin

Advantages: Dermatologically and microbiologically tested

- effectively cleans and cares for the skin of the hands
- does not dry out, moisturizes well and does not cause irritation
- highly concentrated and efficient to use
- leaves a pleasant smell after use

Capacity	(l)	1	5	10	20
Box	(pcs)	–	4	–	–
Pallet	(pcs)	–	108	–	–

D040/D041
PROFESSIONAL

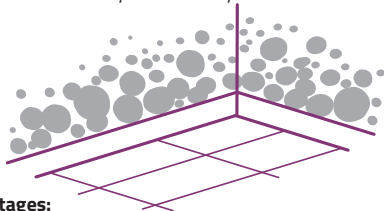

Application: For daily hygiene and hand care. Thanks to a well-selected ingredient formula and the content of glycerin and lanolin, it effectively cleans and cares for the skin of the hands / moisturizes well / does not dry out / does not cause irritation / leaves a pleasant smell and a feeling of freshness after use. The product has been microbiologically and dermatologically tested.

Method of use: Apply a small amount on your hands / soap / rinse thoroughly with water after use.

ROOMS – removal of mold and fungus

MOLD Cleaner (Anty-PLEŚŃ) Ready to use

Strong agent for removing mold and fungus from wet surfaces

Advantages:

- effectively neutralizes and eliminates the mold process
- works by sprinkling - does not require manual cleaning
- renews, protects against moisture and whitens surfaces
- provides a long-lasting effect after application

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	–	–
Pallet	(pcs)	480	–	–	–

D250
PROFESSIONAL

Application: F strong agent for quick and effective removal of all types of mould, fungus and algae from damp surfaces, with long-term protection against their recurrence. It guarantees getting rid of and neutralizing the onerous effects of room dampness thanks to strong and deep penetration of the surface of plaster walls, paint coatings, acrylic, tiles, ceramics, joints, silicone, stone, stainless steel, plastic, enamel, rubber and rubber.

Method of use: Spray the surface with the applicator / leave for 10-20 minutes depending on the degree of contamination / wipe with a damp cloth and leave to dry. Persistent raids - extend the action time or repeat the action. Attention! Product with a whitening effect / do not use on oxidized aluminum / PVC and surfaces with unusual colors. In doubtful cases and damaged surfaces - test in an inconspicuous place.

ROOMS – air freshening

Air CASHMERE (Dolphin CASHMERE) Ready to use

A concentrated air freshener
based on essential oils

Advantages:

- effectively eliminates unpleasant odors
- leaves long-lasting freshness after use
- recommended for all utility rooms
- ideal for odor neutralization in sanitary facilities

Method of use: Spray with an atomizer in an inconspicuous place or a toilet bowl.

CATERING – dishwashers - washing dishes / convection ovens - washing

HARD ALC (Dolphin HARD ALC) Concentrate

Alkaline washing liquid for catering dishwashers

Advantages:

- effectively degreases washed surfaces
- it works regardless of the hardness of the water
- low-foaming and safe to use
- does not contain chlorine in its composition

D094
PROFESSIONAL

3-5 ml / 1l

Alkaline

Capacity	(l)	1	5	10	20
Box	(pcs)	–	4	–	–
Pallet	(pcs)	–	108	40	24

Application: For regular washing in catering and industrial dishwashers – glass / porcelain / ceramics / glass and steel accessories as well as alkali-resistant plastics. Low-foaming agent / safe to use / effective regardless of the water hardness / intended mainly for professional dishwashers with a dosing system.

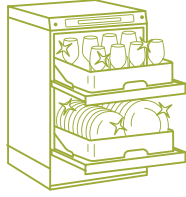

Method of use: Use within the ranges given above, depending on the degree of soiling of the dishes and the hardness of the water.

CATERING – dishwashers - washing dishes / convection ovens - washing

DRY Acid (Dolphin DRY ACID) Concentrate

An acidic rinse aid for commercial dishwashers

Advantages:

- eliminates water stains after current washing
- gives shine to dried surfaces
- effective at varying degrees of water hardness
- recommended with Dolphin HARD ALC washing liquid

Capacity	(l)	1	5	10	20
Box	(pcs)	–	4	–	–
Pallet	(pcs)	–	108	40	24

D095
PROFESSIONAL

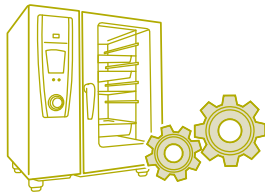

Application: For rinsing and polishing dishes in catering and industrial dishwashers - glass and other washable kitchen accessories / removes surface tension of water / polishes surfaces during the rinsing process / effectively removes water drops and streaks / intended mainly for professional dishwashers with a dosing system / recommended with liquid washing Dolphin HARD ALC.

Method of use: Use within the ranges given above, depending on the hardness of the water.

CONVECT Clean (Dolphin CONVECT Clean) Concentrate

Alkaline liquid for manual and automatic washing of convection ovens

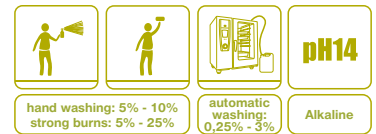

Advantages:

- has strong dissolving and washing properties
- effectively removes organic burns and soot
- safe for stainless and alloy steel
- adds gloss to surfaces after use

Capacity	(l)	1	5	10	20
Box	(pcs)	–	4	–	–
Pallet	(pcs)	–	108	–	–

D097
PROFESSIONAL

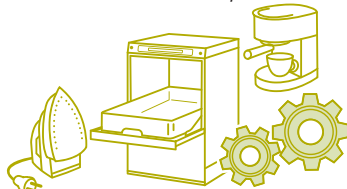

Application: A highly alkaline concentrate for cleaning dirt and burns from the surface of convection-steam ovens, baking tunnels, smoking chambers, grills and catering pans / effectively dissolves and removes all organic deposits and baking - protein, fats and soot, formed during the frying and baking process / Ideal for stainless and alloy steel surfaces - do not use on aluminum surfaces.

Method of use: Use in accordance with the above-mentioned ranges or as recommended in automatic dosing / wash by hand at 40 - 60 °C / rinse surfaces with water after washing and wipe the door seals when wet.

CATERING – descaling devices

DESCALER (Dolphin DESCALER Forte) Concentrate

An acidic liquid for removing stone and mineral deposits

Advantages:

- perfectly removes tarnish and organic deposits
- highly effective even at low concentrations
- safe for acid-resistant surfaces
- has a neutral and non-irritating smell

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	–	–

D096
PROFESSIONAL

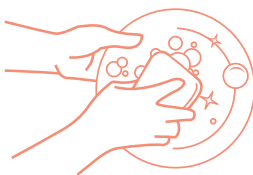

Application: For thorough cleaning and removal of stone and mineral deposits and rust from surfaces - boilers and steamers / dishwashers / boilers / kettles and coffee machines / electric heaters / irons and other acid-resistant surfaces. Take particular care on non-ferrous metals, such as copper or bronze.

Method of use: Use in accordance with the above-mentioned ranges, depending on the degree of sediment / for stubborn sediments use concentrate / after use, rinse thoroughly and abundantly with water.

CATERING – dishes – hand washing

DISH Grapefruit (Pink Grejprut) Concentrate

A concentrated liquid for manual dishwashing with betaine and glycerin

Advantages:

- effectively dissolves and removes greasy dirt
- protects the skin of the hands and does not cause irritation
- highly concentrated and efficient to use
- leaves a pleasant smell and freshness after use

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	–	–

D092
PROFESSIONAL

Application: For hand washing dishes and kitchen accessories. Thanks to the well-chosen formula of ingredients and concentrate density, it effectively dissolves and removes greasy dirt from the washed surface / very efficient in use / does not dry the skin of the hands and does not cause irritation / leaves a pleasant smell and a feeling of freshness after use. The product has been microbiologically and dermatologically tested.

Method of use: Dilute the concentrate with warm water / use the concentration of the solution in accordance with the ranges given above / remove stubborn dirt with concentrate / rinse thoroughly with water after use.

DISH Mint (Green Mięta) Concentrate

A concentrated liquid for manual dishwashing with betaine and glycerin

Advantages:

- effectively dissolves and removes greasy dirt
- protects the skin of the hands and does not cause irritation
- highly concentrated and efficient to use
- leaves a pleasant smell and freshness after use

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	–	–

D091
PROFESSIONAL

Application: For hand washing dishes and kitchen accessories. Thanks to the well-chosen formula of ingredients and concentrate density, it effectively dissolves and removes greasy dirt from the washed surface / very efficient in use / does not dry the skin of the hands and does not cause irritation / leaves a pleasant smell and a feeling of freshness after use. The product has been microbiologically and dermatologically tested.

Method of use: Dilute the concentrate with warm water / use the concentration of the solution in accordance with the ranges given above / remove stubborn dirt with concentrate / rinse thoroughly with water after use.

DISH Aloe (Balsamic Aloes) Concentrate

A concentrated liquid for manual dishwashing with betaine, glycerin and aloe

Advantages:

- effectively dissolves and removes greasy dirt
- protects the skin of the hands and does not cause irritation
- highly concentrated and efficient to use
- leaves a pleasant smell and freshness after use

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	–	–

D093
PROFESSIONAL

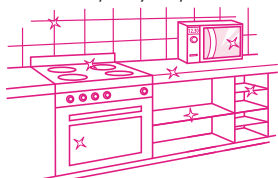

Application: For hand washing dishes and kitchen accessories. Thanks to the well-chosen formula of ingredients and concentrate density, it effectively dissolves and removes greasy dirt from the washed surface / very efficient in use / does not dry the skin of the hands and does not cause irritation / leaves a pleasant smell and a feeling of freshness after use. The product has been microbiologically and dermatologically tested.

Method of use: Dilute the concentrate with warm water / use the concentration of the solution in accordance with the ranges given above / remove stubborn dirt with concentrate / rinse thoroughly with water after use.

CATERING – work surfaces / devices degreasing

OIL Cleaner (OIL Cleaner) Ready to use

Agent for the ongoing degreasing of dirty surfaces

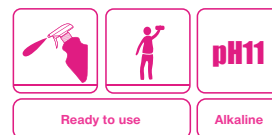

Advantages:

- removes oil, grease and vegetable deposits
- works quickly and efficiently
- leaves a pleasant lemon scent after use
- recommended in catering and households

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	480	–	108	–

D560
PROFESSIONAL

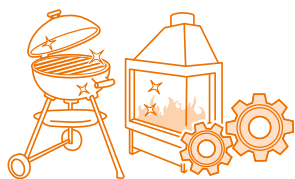

Application: For the current cleaning of oil and greasy organic and vegetable deposits from all washable surfaces - worktops and kitchen appliances / filters, kitchen absorbers / ovens / heating plates. Do not use on transparent plastic, wooden and wood-like surfaces. It has the „PZH” Approval - „HZ” Health Quality Certificate.

Method of use: Use an atomizer spray the cleaned surface / wipe dry with a cloth or cleaning cloth / persistent dirt spray with the agent and leave for a few minutes / neutralize with water and wipe dry.

CATERING – grills / ovens / fireplace glass - cleaning

GRILL Cleaner (GRILL Cleaner) Ready to use

An agent for thorough cleaning of grills, ovens and fireplaces

Advantages:

- effectively degreases and cleans burns
- removes soot deposits from fireplace glass
- cleans the glass of kitchen ovens
- safe on all surfaces

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	–	4	–
Pallet	(pcs)	360	–	108	–

D500
PROFESSIONAL

Application: For removing burns, degreasing and cleaning - grills / grates of ovens and fireplaces / bakery and fireplace glass. Also recommended for plates and grates of gas stoves / electric stoves / kitchen accessories.

Method of use: Use an atomizer to sprinkle the surface with the ready-to-use agent / leave for a few minutes / severe burns - repeat the steps / rinse thoroughly with water / wipe dry with a duster or cleaning cloth.

LCD SCREENS - washing / care

LCD Cleaner (Dolphin LCD CLEANER) Ready to use

Agent for cleaning and care of all screens and LCD, TFT, LED, OLED displays, etc.

Advantages:

- effective on smooth and porous surfaces
- removes greasy marks, fingerprints, dirt and dust
- leaves an electrostatic film
- safe for plastics, rubber and plastic elements

Capacity	(l)	0,75	1	5	10
Box	(pcs)	20	-	-	-
Pallet	(pcs)	480	-	-	-

D203
PROFESSIONAL

Ready to use

Neutral

Application: A specialist agent for cleaning all kinds of touch screens, plasma screens, LCD, TFT, LED, OLED displays used, among others, in in smartphones, tablets, TV sets or computer monitors. It can also be used to clean electronic equipment housings, glass surfaces, keyboards and remote controls. Effectively removes greasy marks, fingerprints, dirt and dust from smooth and porous surfaces. After application, it leaves an electrostatic coating that reduces re-soiling. It has a pleasant smell. Fully safe for cleaned surfaces, does not cause them to become dull.

Method of use: Apply a small amount of the preparation on the surface, spread it, then wipe it with a soft microfiber cloth.

DOSING SYSTEMS – automatic dosing of working solutions

1. functional dispenser

- single-product dosing
- concentrates in collective packaging 1/5/10/20 L
- simple operation
- precise dosing of working solutions
- also recommended for small washing machines

1. and 4. functional wall dispenser

- single and multi-product dosing
- concentrates in collective packaging 5/10/20 L
- simple operation
- precise dosing of working solutions
- also recommended for small washing machines

quick refueling station

- adapted to one product
- concentrates in collective packaging of 200 L
- simple operation
- quick dosing of working solutions
- recommended for large washing machines

CARS CHEMICALS

SPECIAL Caros (SPECIAL CAROS) Concentrate

Active foam for washing and cleaning the car bodies of motor vehicles

Advantages:

- suitable for high-pressure cleaners
- effective in cleaning operational dirt
- the best for the current cosmetics of motor vehicles
- also recommended for cleaning alkali-resistant facades

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D410
PROFESSIONAL

Application: For the ongoing cleaning of car bodies of all vehicles - passenger cars / vans / coaches / rail vehicles. Also recommended for cleaning various floor surfaces and alkali-resistant facades. Due to the wide range of working concentrations, it is effective at various levels of dirt.

Method of use: Dilute the concentrate depending on the degree of soiling / use the concentration of the solution in accordance with the ranges given above / do not allow the agent to dry on the surface / avoid hot and sunny surfaces / rinse thoroughly with water after washing.

DUO Caros (DUO CAROS) Concentrate

Two-phase active foam for cleaning car bodies and engines of motor vehicles

Advantages:

- suitable for high-pressure cleaners
- very effective in cleaning strong dirt
- designed for all trucks
- also recommended for cleaning alkali-resistant facades

Capacity	(l)	1	5	10	20
Box	(pcs)	–	4	–	–
Pallet	(pcs)	–	108	40	24

D430
PROFESSIONAL

Application: For cleaning heavily soiled car bodies of all vehicles - trucks / TIR tarpaulins / railway and tram rolling stock / engines / construction and agricultural machinery. Also recommended for cleaning various floor surfaces and facades resistant to alkali.

Method of use: Dilute the concentrate depending on the degree of soiling / use the concentration of the solution in accordance with the ranges given above / do not allow the agent to dry on the surface / avoid hot and sunny surfaces / rinse thoroughly with water after washing.

SHAMPOO Caros (SHAMPO CAROS) Concentrate

Shampoo for washing and caring for car bodies

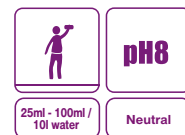

Advantages:

- suitable for manual washing and care
- effective in removing small and medium dirt
- best for the current cosmetics of passenger vehicles
- efficient, creates a thick foam with a pleasant smell

Capacity	(l)	1	5	10	20
Box	(pcs)	12	4	–	–
Pallet	(pcs)	360	108	40	24

D490
PROFESSIONAL

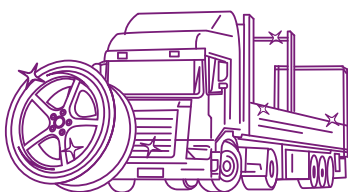

Application: For manual washing of lightly soiled car bodies. Very efficient in use, creating a thick foam with a pleasant smell.

Method of use: Dilute the concentrate depending on the degree of soiling / use the concentration of the solution in accordance with the ranges given above / create a dense foam, apply to the car body and wash with a sponge or a soft brush / do not allow the agent to dry on the surface / rinse thoroughly with water after washing.

ALU Caros (ALU CAROS) Concentrate

Strong acidic agent for thorough aluminum cleaning

Advantages:

- only suitable for acid-resistant surfaces
- it effectively „digests“ air raids and exploitation sediments
- restores vehicle components
- ideal for aluminum rims and car sides

Capacity	(l)	1	5	10	20
Box	(pcs)	–	–	–	–
Pallet	(pcs)	–	–	40	–

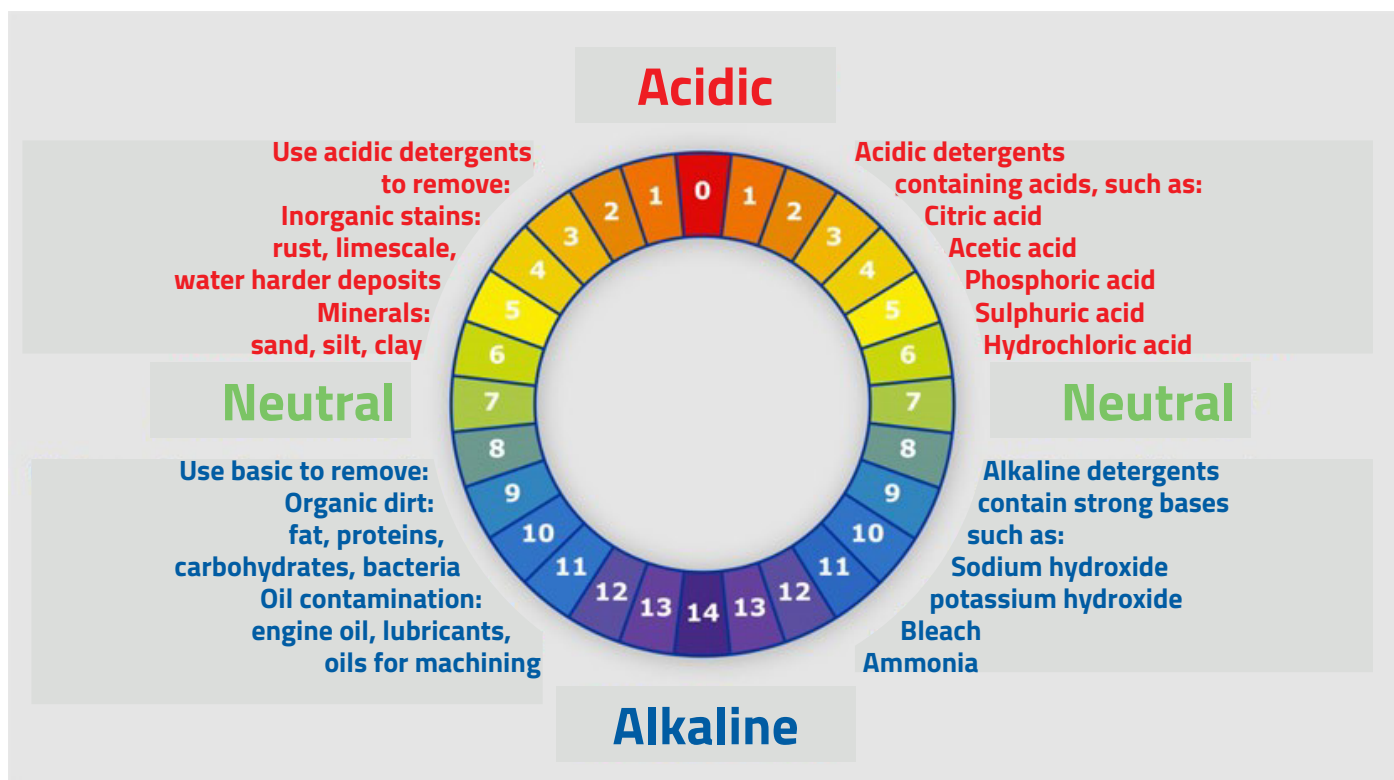

D460
PROFESSIONAL

Application: For thorough cleaning / etching of operating sludge from elements made of aluminum - mainly in motor vehicles - the sides of trucks and aluminum rims, except for painted and chrome-plated.

Method of use: For thorough cleaning / etching of operating deposits from parts made of aluminum - mainly in motor vehicles - the sides of trucks and aluminum rims, except for painted and chrome-plated.

Rules for removing dirt in surface hygiene:

The effectiveness of water-based chemicals also depends on their components.
